Foreign Language Training

German language has played a crucial role for centuries in Europe and on the world stage. The importance of German language is known by an estimated one-hundred forty million across Europe and around the world. German is tied with French as the most learned second language in the European Union. A good number of the original immigrants to America were German and they brought with them many customs and traditions to America.

German language in the European Union is the most crucial language to possess because it bridges the particular divide involving the established and emerging financial systems of Central and Eastern Europe. As a result knowing German is highly valued as many people in parts of Poland, Hungary, Romania, Russia, the Ukraine, the Baltic States and the Czech Republic are German speakers. They form the biggest group of potential business partners in the European Union, forming around one third of the population. Therefore it is a great asset to have.

German language is particularly relevant for engineering students as it opens doors to people around the world for higher education, business and travel.

In view of the present demand of this language, the students are going to be trained in German Language from 12th, November, 2014 to 20th, November, 2014 by, Ms. Jamile Araujo

Foreign Language Training

Many Indian companies are expanding their businesses across the world. It becomes essential for professionals to acquire foreign languages to overcome communication barriers and to better business transactions.

Japan is an important trading partner for India. Further there are cultural exchanges and cooperation between the two nations. Therefore learning Japanese gives the students a much needed edge for vocational and societal needs.

The objective of the basic level in Japanese language is to provide an insight into the language and through it, give a glimpse of the fascinating Japanese culture.

Mr.Nagarathinam will train the students in Japanese from the 12-24th November 2014. The following is the list of students who have registered for the program.

1	II B.Tech. CSE-B	K. RENUKA
