HACKATHON

Women hackathons are revolutionizing the tech industry

“The creation of something new is not accomplished by the intellect, but by the play instinct arising from inner necessity.”

Women are a dreadfully underrepresented group in almost all divisions of tech. There is no doubt that the tech industry can tangibly benefit from an increase in gender diversity. A lot of tech giants have realized the pros of a varied and diverse workforce. Not only the giants but, today, on a global scale the entire Industry is recognizing the importance of gender diversity and how it leads to better problem solving and overall business management.
