Report on Screen Printing Workshop at WTP, SVECW

Screen printing is a versatile art form. It is a printing technique whereby a mesh is used to transfer ink onto a substrate, except in areas made impermeable to the ink by a blocking stencil.

This intensive two day screen printing workshop offered a broad range of information and hands-on printing experience. This training is great for the beginner. We offered this class at WTP, SVECW campus. Each student gets to print in this hands-on, two-day workshop offering practical printing experience and a broad range of information for textile printers, and is designed to teach you everything you need to know to start printing great looking T-Shirts.

Two-day live demo workshop being conducted in two batches on **18th and 19th Dec 2019 from 10am - 5pm**. We have limited the class size to 30 students to ensure each participant got ample printing time and personal attention.

Techniques like multi color printing, seamless printing, glitter printing, single color printing, brush shade and much more. Students have been learned the techniques, understand the process and experienced a fun workshop at WTP.

By attending this workshop students could be able to do print on T-shirts, saris, Bed linens, Gift bags.

Few pictures of the workshop.
