Linear IC Applications Laboratory

Laboratory-In-Charge: Mr. V.Srinivasa Rao

Laboratory-Technician: Mr. P.Chiranjeevi Varma

Objective:

To educate students with the knowledge of designing various circuits using Op-Amp and verify the applications of op amp, Design different timing circuits using IC 555 timer, applications of PLL in industry for control systems. In this Lab students are doing mini projects and main projects using different ICs and discrete components. The students are improving their designing skills to implement different projects. With the help of these projects students are in a position to face interviews for core companies such as John Deere, HCL, and Siliconus etc.
